
Subject :
Bolt-in Baffle Kit for Models Equipped with Fabricated Decks 42", 48" 52"

Models Affected :

Husqvarna : Tractors : All Equipped with Fabricated Decks 42", 48" & 52"

Husqvarna : Zero Turn : RZ and EZ Equipped with Fabricated Decks 42" & 48"

Dixon: Zero Turn : SpeedZTR and Ram Equipped with Fabricated Decks 42" & 48",

Possible Serial Numbers Affected :

Service Information:

Some quality of cut issues have been reported on tractors and zero-turn mowers equipped with fabricated decks. Lush or wet cutting conditions contribute to the cut quality issue.

These decks are equipped with front baffles which in most cases provide a high quality of cut. Due to variation of moisture content, types of grass and seasonal cutting conditions, occasionally the deck's discharge ability may be reduced.

Some reports are of an accumulation of grass being discharged leaving a debris clump on the lawn. Other reports are of a buildup in lawn clippings under the deck and reduction of flow.

In an effort to make the fabricated deck more "tunable" for varied cutting conditions, we are introducing the bolt in baffle kits. Customers may find under some cutting conditions, performance is improved by removing the front baffles and bolt-in confinement plate. Under other conditions, performance may be improved with the baffles and/or confinement plate installed. Mulch kits always require the baffles to be installed.

Installation of this kit requires removal of the welded-in baffles and installation of in the bolt in kits. An example of a bolt-in baffle kit is shown below.

42" BOLT-IN BAFFLE KIT, 583833501 Orange/583833502 Blue

48" BOLT-IN BAFFLE KIT, 583833601 Orange/583833602 Blue

52" BOLT-IN BAFFLE KIT, 583833701 Orange/583833703 Blue
